WORK EXPERIENCE

Axidel (personal collection management)   **August 2024 - Present**

- Built a full-featured web application using ASP.NET Core, React.js, and PostgreSQL.
- Implemented multi-language support, role-based access, and real-time updates across the platform.
- Designed a responsive interface for seamless use across all devices, including mobile.
- Developed advanced features such as full-text search, custom field management for collections, and item tagging.

Partify (Booking System Application)   **May 2024 - Jule 2024**

- Led the development of "Partify" using ASP.NET and EF Core, focusing on backend services for property management.
- Optimized project logic by 80% through hands-on practice, enhancing search
- algorithms and database performance.
- Improved architectural design to ensure scalable and reliable system operation.

Appartment.uz (Booking System Application) - **https://axrordev.uz**   **Mar 2023 - Aprel 2023**

- Developed a full-featured, responsive web application for real estate transactions using React.js and Tailwind CSS.
- Integrated Firebase for real-time data management and authentication.
- Enhanced the user experience by ensuring accessibility and mobile-first design principles.

EDUCATION   Nov 2023 - June 2024

Haad Learning Center, Tashkent. .NET Bootcamp Result

- Focused on Enterprise Application Development using ASP.NET Core.
- Concentration on Web Application Architecture and Design Patterns
- Developed a Partify (rent/sold appartment) application for the final project.
